## New Improved Electronic Control Board Board 060

### Manaras-Opera BOARD 060 "Intelligent Engineering"

The new improved Electronic Control Board will be installed in all Manaras-Opera operators with ECB and can retrofit any previous electronic control board.

For easy access and field maintenance, BOARD 060 is divided into two separate boards; one for **Power** and one for **Control**.

#### — New Innovative Features of BOARD 060 —

- Simplified configuration of diagnostic lights on board.
- Industrial type heavy duty relays.
- Supplementary information provided on the rotary selection switch dial.
- One-way quick-connecting socket attaches power board to the control board.
- Easy access to power and control voltage terminal strips.
- Easy access to motor terminals, allowing for direction re-wiring in seconds.
- Ready to receive optional warning light module.
- Indicator LED shows the status of the motor's centrifugal switch.
- Timer-to-close can be activated and deactivated from floor level using a 3-button station.
- Additional open and close relay status lights.
- Fewer wire connections improve maintenance efficiency.

#### — Pricing —

- Operator and replacement board pricing remains the same.

The phasing-in/out process will begin March 2007, for a two month period.
