Plug-in radio receiver

Manaras-Opera's New Radio Receiver for ECB Operators

Manaras-Opera is pleased to announce that they have developed a new optional operator radio receiver, RADIOKIT 003.

Features of RADIOKIT 003

- RADIOKIT 003 is an optional plug-in radio receiver card available for all operators equipped with an electronic control board, BOARD 060.
- The receiver card plugs into the electronic control board with ease and clips securely onto the board via three support posts.
- 313MHZ for single button (open/close) type with B2 wiring.
- 1024 possible code combinations available with a 10-digit binary dipswitch.
- The receiver controls one operator with MT series transmitters (available from Manaras-Opera and its distributors). Operates on 24VDC.
- One MT series transmitter can control multiple receivers with the same dip switch setting.
- A L.E.D. indicates that the unit has been activated.
- The radio receiver card can also be used on environmental NEMA 4/12 and 4X operators.
- The card can also be factory installed (MOD 028) and there is no need for an external receiver.
- RADIO 014 remains available for hardwired operators or as an external hook up.

Pricing

- Please consult your inside sales representative for RADIOKIT 003 and MOD 028 pricing.

RADIOKIT 003 and MOD 028 are now available.
