Reflective Photo Cells For Monitored Entrapment Protection

Monitored External Entrapment Protection Device

PHOTO 065

Manaras-Opera Showcases Their Newest Monitoring Reflective Photo Cell

Manaras-Opera is pleased to showcase their Retro-Reflective Photo Cell - **PHOTO 065** - for use as a Monitored Entrapment Protection Device.

PHOTO 065 can be used to safeguard doors according to the requirements of **UL325**.

Product Details

- Retro-Reflective Technology.
- Polarized beam for maximum reliability.
- Red-light technology improves resiliency to ambient light and infrared sensors.
- Single-sided photo eye design which requires less wires to run and therefore significantly reduced installation time.
- No batteries needed.
- Nema 4X rated for Harsh Environments.
- Operation temperature: -30°C to 60°C (-22°F to 140°F).
- Heavy-duty housing, increasing it's ability to withstand impact.
- Connects to specific **MONIT** terminal on electronic control board (**BOARD 070M**).
- High range (5 ft. to 50 ft).
- Includes L-shape metal mounting brackets and hardware.
